

Ted M. Cleveland, MBA, PG, CPG
Vice President, Eastern Region

500 Sandau Rd, Ste. 300 San Antonio, Texas 78216

210-682-4480

ted_cleveland@efiglobal.com

Years Experience: 27

Professional Summary:

Mr. Cleveland is responsible for the overall management and supervision of EFI Global's branch offices in the Eastern Region. He has over 27 years of management experience with multi-disciplined engineering consulting services and has concentrated on providing senior management for multiple branch offices and regions throughout the United States. His background includes strategic planning, forecasting, recruiting, business development, employee development and financial management of operations.

He has expertise leading a wide variety of projects including education, healthcare, hospitality, government, residential, industrial, and transportation. Mr. Cleveland also has extensive management experience relating to all phases of projects including proposal generation, investigation, design, bidding, contract administration, and construction.

Mr. Cleveland serves as the Director of EFI Global's Catastrophe Response Team. He has been involved in the planning and execution of EFI's response to the 2008 Iowa floods, Hurricanes Sandy, Ike, Dolly, Katrina, Rita and Wilma as well as other large scale natural disasters.

Licenses and Certifications:

Professional Geoscientist, TX, #3253

Certified Professional Geologist, #10595, AIPG, 2001

Project Management Experience:

City of Cedar Rapids

Cedar Rapids, Iowa

Director for industrial hygiene consulting services related to restoration of multiple government buildings following a major flooding event. Projects included indoor air quality, water infiltration, safety, hazardous material investigation and remediation oversight.

Boysville Campus

Converse, Texas

Program Manager for the real estate assessment of a 78 acre campus. The project included a Phase I Environmental Site Assessment, Property Condition Assessment, real estate appraisal, Highest and Best Use study and a Capability Analysis. Presented findings of the study to the Board of Directors.

Project Management Experience (Continued),

State Highway 130

Central Texas

Program Manager/Principal-in-Charge for a geotechnical investigation relating to the design/build of a 90 mile segment of a toll road costing approximately \$1.5 billion. The project included drilling, laboratory testing, and engineering design of foundations for bridges, roadways and other structures.

US Postal Service

Multiple Sites, Texas / Oklahoma

Project Manager for a full-range of industrial hygiene consulting projects for over eighty (80) postal facilities throughout Texas and Oklahoma. Projects included hazardous materials inspections, design, contract administration and monitoring.

Archdiocese of San Antonio / Diocese of Victoria

Project Manager for EPA compliance program for 65 Catholic schools located throughout South Texas. Conducted training, inspection, prepared design documents and assisted the client in recovering EPA funding. Performed contract administration services and construction monitoring.

VIA Metropolitan Transit

San Antonio, Texas

Program manager for environmental consulting services related to renovation of historic railroad depot and adjacent warehouse. Project included hazardous materials investigation, design and remediation/abatement oversight.

ALCOA; Sherwin Alumina Plant

Gregory, Texas

Senior Technical Consultant for a 5-year asbestos abatement program for an industrial facility. Responsibilities included project design, scheduling, review of contractor's submittals and approval of contractor's payments.

Multiple Development Sites

Austin and San Antonio, Texas

Project Geologist and Senior Reviewer for various geologic recharge assessments required for development for the Edwards Aquifer Recharge zone. Performed site reconnaissance, investigation of drainage areas and recharge features. Provided oversight of EM-31 conductivity survey to delineate potential faults affecting construction activities. Prepared final reports and site maps to be submitted to the state of Texas.
