

EFI Global is a full-service engineering, fire investigation, environmental, health and safety and specialty consulting services firm serving a variety of industries in both the public and private sectors. Our forensic service teams around the world share a dedication to expertise, quality and demonstrating to customers that caring counts®. Each of our more than 500 professional engineers, fire investigators, architects and scientists was selected for his or her technical proficiency, in-depth industry knowledge and commitment to professional integrity. Together, our diverse backgrounds and collective insights empower clients to make better-informed business decisions.

## FORENSIC ENGINEERING | Single source for all your engineering needs

*With experts in virtually every field, and the ability to scale our services for simple evaluations or exhaustive investigations, we deliver a timely, in-depth analysis for every project*

- Structural and civil
- Mechanical and electrical
- Metallurgical and chemical
- Fire protection
- Construction management
- Window / door protocol
- Catastrophe response
- Vehicle accident reconstruction
- Building envelope assessment
- Human factor analysis
- Roofing evaluations
- Damage assessment
- Automotive analysis
- Material science
- Design services

## ENVIRONMENTAL SERVICES | Full-service consulting and engineering experts nationwide

*Offering experts who can evaluate and ensure overall health and safety, measure and control environmental impact, and recommend and support resourceful project plans*

- Abatement / remediation management
- Occupational health and safety solutions
- Indoor air quality / mold assessments
- Construction monitoring / management
- LEED / green building support services
- Hazardous material management
- Emergency spill response
- Soil / ground water remediation
- Industrial hygiene consulting
- Asbestos, lead, PCBs consulting

## FIRE INVESTIGATION | Residential, commercial, industrial, vehicle, equipment, marine and wild land fires

*Offering the largest team of fire investigation experts in the industry, with the ability to provide clients with the highest technical and scientific services available*

- Origin and cause investigation
- Flammability analysis / testing
- Event documentation / simulation
- Evidence collection / storage
- Arson investigation
- Component testing
- Product failure analysis
- Liability assessment
- Site analysis
- Fraud assessment
- Contents analysis
- Subrogation

## GEOTECHNICAL SERVICES | Thorough investigations, invaluable insight and immediate response

*Offering a geotechnical and geological service team with state-of-the-art tools and techniques to deliver the highest quality work product in the industry*

- Sinkhole subsidence investigations
- Mine subsidence investigations
- General subsidence investigations
- Drilling exploration
- Laboratory soil testing
- Structural damage analysis

## MARINE INVESTIGATIONS | Forensic engineering and fire investigation for this unique discipline

*Offering a specialized group of court-qualified experts, experienced working with admiralty attorneys, marine surveyors, heavy equipment operators and other experts*

- Recreational watercraft
- Waterfront structures
- Vessel collisions / allisions
- Commercial shipping
- Code compliance
- Offshore platforms
- Cruise ships
- Marine cargo
- Product defect
- Yachts
- Marina fires
- Subrogation
