

David Lloyd | EHS Project Manager and Safety Director, CSP, CIEC

155 West Street, Suite 6, Wilmington, MA 01887

Phone 401.578.8964

Dave.Lloyd@efiglobal.com

Professional Summary:

Mr. Lloyd is a Certified Safety Professional (CSP) and an Environmental, Health, and Safety (EHS) expert with over 30 years of experience. He has an exceptional ability to proactively seek out and evaluate potential EHS risks and liabilities and excels in finding and implementing the solution and correction of any identified problems or issues. Mr. Lloyd believes that modelling the continuous improvement mindset and staying passionate and persistent when it comes to solving problems is a key foundational element of EHS work.

Mr. Lloyd has driven EHS program development and implementation efforts for multiple manufacturing, construction, and field service operations located in the United States and overseas. He has an outstanding history of EHS regulatory compliance and over 15 years of direct experience administering employer workers' compensation insurance programs, including loss prevention and claims management. Additional experience includes environmental permitting, hazardous waste management, emissions monitoring, and management of environmental remediation projects.

As EFI Global's Corporate Safety Director, Mr. Lloyd is responsible for the leadership and management of the organization's health and safety program, implementation of safe practices, and reduction of employee injuries.

Areas of Expertise:

- Occupational Health & Safety Consulting
- EHS Regulatory Compliance & Auditing
- EHS Program Development & Administration
- Indoor Air Quality

Licenses and Certifications:

Certified Safety Professional (CSP), Board of Certified Safety Professionals (BCSP) Cert. No. 19323

Council-Certified Indoor Environmental Consultant (CIEC), Cert No. 1803012

Project Experience:

Health & Safety Audits

Federal Occupational Health (FOH), IRS and GSA Nationwide

Performance of health and safety audits of Internal Revenue Services (IRS) and General Services Administration (GSA) operations and facilities. The scope of the audits included assessment of health and safety programs managed at the site, a physical review of the property including its systems and operations, as well as evaluation of health and safety recordkeeping and associated documentation. Determined whether each property was in compliance with all applicable Executive Orders, OSHA, State and/or local occupational standards and regulations. Post audit activities included further development and categorization of findings, assessment of program status, and production of a formal audit report.

Environmental Compliance Audits**Federal Occupational Health (FOH), IRS and GSA Nationwide**

Performance of environmental compliance audits for various GSA buildings nationwide. Audits included a physical review of the property including its physical plant systems and operations as well as a review of all required plans, recordkeeping, and associated documentation. Determined whether each property was in compliance with all applicable Executive Orders, Federal, State and/or local environmental laws and regulations. Post audit activities included further development and categorization of findings, assessment of program status, and production of a formal audit report.

Environmental Health & Safety**The MITRE Corporation, Bedford, MA**

Lead EHS Consultant providing on-site consultation and environmental health and safety program management at both a corporate and location specific levels. Mr. Lloyd also provides oversight of national EHS compliance programs, environmental auditing and compliance, plan development and review and environmental permitting assistance.

Global EHS Group Leader, TPI Composites, Warren, RI

Responsible for the leadership of a Global EHS Center of Excellence group comprised of EHS Leaders from all TPI operations. The primary function of the EHS COE group was to recommend and establish global EHS standards, best practices, KPI's, and establish a path for attainment of EHS Management System registration on a site-by-site basis.

Corporate EHS Engineer, TPI Composites, Warren, RI

Responsible for establishment, execution, and management of the strategic direction for the EHS function of an international composites manufacturer. Primary function was to serve in the capacity of subject matter expert for all relevant EHS activities including safety/loss prevention, environmental permitting, hazardous waste management, and emissions monitoring with an overall objective of ensuring company-wide compliance with applicable EHS regulations and corporate EHS goals and standards.

Indoor Air Quality Testing**University of Rhode Island (URI), Kingston, RI**

Mr. Lloyd serves as EFI's Project Manager/Air Quality Scientist under URI's Indoor Air Quality Testing contract. Mr. Lloyd has successfully completed more than 50 assessments on time and within project budgets. Work under this contract has included evaluating occupant complaints and encompassed a wide variety of indoor spaces at URI's multiple campuses. Mr. Lloyd works directly with URI's Environmental Health & Safety Department and prepares detailed report findings with recommendations. Mr. Lloyd routinely provides a 24-hour response to URI's requests.
