Garth Armstrong | Senior Project Manager

8091 Center Run Road, Unit 191, Indianapolis, IN 46250 *Office: 317.585.6430 Mobile: 317.699.3203*
garth.armstrong@efiglobal.com

Professional Summary:

Mr. Armstrong is a senior project manager with more than 15 years of experience in the environmental remediation and consulting field. His experience includes phase I and phase II environmental site assessments, including groundwater and soil investigations, UST removal, hazardous waste and soil removal with subsequent site restoration, and identifying a variety of hazardous building conditions to include sampling of asbestos, PCB, lead, mold, and clandestine drug lab sampling. His experience also includes performing OSHA safety audits, stormwater sampling, implementation of erosion control measures and SWPPP compliance while maintaining consistent contact with regulatory agencies at the local, state, and federal levels. Mr. Armstrong also has significant experience in commercial construction and residential inspection, including substantial interaction with real estate professionals.

Areas of Expertise:

- Project Management; Coordination and oversight
- Asbestos, lead, PCBs & hazardous building materials identification
- Remediation of environmentally impacted sites
- Phase I Environmental Site Assessments and Phase II Subsurface Investigations

Licenses and Certifications:

OSHA 29 CFR 1910.120 40-Hour Safety Training

OSHA 29 CFR 1910.120 8-Hour Refresher Safety Training (annual)

Red Cross First Aid/CPR Training (biennial)

Primary Radon Tester, IN, Lic. #RTP01068

Licensed Home Inspector, IN, Lic. HI01900096

Project Experience:

Environmental Investigations, Pearl Cleaners, Evansville, IN
Project Manager for site impacted by historical chlorinated solvent releases. Activities included contractor coordination, providing direction for field crew to conduct soil boring and groundwater sample collection, and subsequent report writing and client outreach.

Environmental Consulting, Multiple Sites
Project Manager for ongoing groundwater sampling and monitoring at multiple locations across Indiana. Activities were conducted at several facilities including gasoline stations and former manufacturing facilities to monitor petroleum and chlorinated solvent impacts.

Former Roots Blower Company, Connersville, IN
Conducted OSHA safety audit for transition of facility ownership. Responsibilities included identifying equipment for lockout/tagout procedures, full audit and implementation of updated MSDS sheets, and ongoing waste consolidation. Also arranged for removal and disposal of wastes generated at site.

Former GE Manufacturing Facility, Bloomington, IN
Project Manager for a variety of activities at the site prior to and during decommission, including PCB wipe sampling for equipment decontamination determination, collected stormwater sampling and sewer line tracing for facility compliance.

Hazardous Materials Surveys, Multiple Sites
Conducted numerous asbestos and hazardous materials surveys in multiple locations across Indiana. Projects included bulk asbestos, lead, PCB, and clandestine drug lab sampling. Also provided contractor oversight for subsequent abatement activities and report writing.

Former American Tissue Facility, Augusta, ME
Provided oversight for facility closure and demolition. Duties included removal and disposal of waste debris including building materials, UST's and impacted soil from the site. Also provided ongoing groundwater monitoring and contractor oversight for future site development.

Bates Mill Facility, Brownfield Site, Lewiston, ME
Provided oversight for mill renovation. Activities included decommissioning and removal of facility equipment. Also acted as environmental scientist for multiple Phase I ESA's, groundwater monitoring, PCB impacted soil removal, and site redevelopment.

Pine State Recycling Facilities, Multiple sites in Maine and New Hampshire
Project Manager for arranging and conducting stormwater sampling at multiple recycling facilities for SWPPP compliance. Also performed client outreach and subsequent report writing.

Smith Junkyard, Superfund Site, Meddybemps, ME
Identified and consolidated hazardous waste for disposal from former junkyard designated as a Superfund site. Acted as supervisor between state enforcement officials and remediation contractor for site cleanup.

Professional Experience:

EFI Global, Senior Project Manager, July 2021 – Present
Enviroforensics, Project Manager, 2018 – 2019
SES Environmental, Project Manager, 2014 – 2018
Summit Environmental, Environmental Scientist, 2010 – 2014

Education:

BS, Environmental Management, Indiana University, Bloomington, IN, 2000
