40-Hr. Hazardous Waste Operations / 8-Hour Supervisor

Project Experience:

Hazardous Building Materials Surveys / Project Manager / Multiple Sites Project Manager for multiple hazardous building material surveys that included identification of waste streams prior to demolition of commercial and industrial building. Waste streams included asbestos, lead, fluorescent lights, mercury containing switches, PCB-containing equipment, CFC-containing equipment, and chemical inventory.

Chinese Drywall / Project Manager / 31-Story Condominium Tower / Aventura, Florida Project Manager for 31-story condominium tower in which Chinese drywall was discovered. Project included the assessment of all units and common areas for the presence of Chinese drywall, remediation of all areas in which Chinese drywall was identified, and restoration of the impacted areas. Performed all project management responsibilities including senior review of project documentation, attendance of required senior staff meetings, and health and safety office for project.

Industrial Hygiene / Project Hygienist / Medical Laboratory / Miami, Florida Decontaminated former medical laboratory that performed analysis of biohazardous materials that included bodily fluids.

Industrial Hygiene EPA Compliance / Project Hygienist / Manufacturing / Mulberry, Florida Prepared EPCRA Form R for a major phosphate manufacturing facility. Reviewed inventory and emissions data to reconcile quantities of fugitive emissions for submittal of Form R. Project came in under budget.

Industrial Hygiene PM-10 Air Monitoring / Project Hygienist / Government / Bradenton, Florida Performed air sampling following CFR protocol for total suspended particles (lead) and PM-10 for FDOT project. Responsibilities included daily scheduling of air monitoring, correspondence with client, and daily notification of FDOT with results.

Environmental Assessment / Project Manager / Agricultural / Citrus County, Florida Performed Phase I ESA on former citrus grove and came in under budget. Conducted Phase II ESA that included soil and groundwater analysis for petroleum and pesticides/herbicides.

Landfill Closure RCRA / Project Manager / Residence / Lecanto, Florida Performed Phase I ESA on multi-acre private residence. During historical review phase of project, it was discovered that a large excavation appeared and was filled. Conducted Phase II ESA in this area of the property and it was discovered that this excavation had been used as an unregistered landfill. Completed closure of this unregistered landfill in compliance with RCRA and State of Florida regulatory requirements.

Asbestos Project Design and Management / Project Manager / Resort / Orlando Florida Designed and developed plans and specification for the abatement of ACMs located throughout multi-building resort. Project included abatement oversight, final clearance air testing, and technical review of final report. Performed daily project management duties including scheduling of technicians, correspondence with client and regulatory agencies. Project was completed on time and on budget.

Asbestos AHERA 3-Year Re-Inspections / Project Manager / Government / Throughout Florida Performed and managed three-year AHERA compliant re-inspections for over 25 counties in Florida since 1998. This has included fieldwork, development of re-inspection reports and technical review of final reports. Projects have been completed on time and on budget.

Microbial Consulting and Remediation Oversight / Project Manager / Resort / Orlando, Florida Prepared specifications for microbial remediation project that included 19-resort buildings and 14-story tower building for resort in Orlando, Florida. Performed all project management responsibilities including daily scheduling of project hygienists, senior review of project documentation, attendance of required senior staff meetings, and health and safety office for project.

Plant Demolition Consulting Services / Project Manager / Power Plant / Suwannee, Florida Designed and developed plans and specification for the inspection of hazardous building materials prior to the demolition of a power plant. Developed project specifications for the abatement of asbestos and LBP Project included abatement oversight, final clearance air testing, and technical review of final report. This also included the development of a PCB plan for the site. Performed daily project management duties including scheduling of technicians, correspondence with client and regulatory agencies.
