No.: LRC-00002368

DOSH Certified Site Surveillance Technician in the State of California –No.: 17-6115

40 Hour Hazwoper

OSHA 30

### Project Experience:

#### **Lead Sampling and Analysis of Properties in the Vicinity of the Exide Facility, Vernon, CA**

Mr. Cohn is currently part of an EFI Global team, to perform lead, paint, and soil sampling for the Exide project. He also assists in managing, collecting samples, and training lead sample technicians. EFI Global is under contract with the Department of Toxic Substances Control (DTSC) to assess potential aerially deposited lead (ADL) contamination in nearly 3,000 residential and public properties within a 1.7 mile radius around the former Exide Technologies Battery Recycling Facility in Los Angeles. EFI Global is responsible to assess lead concentrations in soil at residential properties, parks, schools, and daycare centers in order for DTSC to determine if further cleanup action is warranted. In addition, EFI Global is conducting exterior lead-based paint (LBP) screening on all residential properties.

#### **AAA Lead Consultants & Inspections Inc., Corona, CA**

Performed lead-based paint inspections in government, industry, housing, educational institutions, correctional institutions, private citizens and non-governmental institutions. Performed project monitoring of lead abatement activities involving many school districts throughout Southern California.

#### **CF Environmental, City of Industry, CA**
