

Michael Pacifico | Environmental Advisor

2055 W. Army Trail Road, Suite 106, Addison, Illinois

224-275-0082

Michael.Pacifico@efiglobal.com

Professional Summary:

Mr. Pacifico has twelve (12) years of experience in the environmental field. His technical expertise includes asbestos and lead inspections, mold investigations, fire and smoke damage assessments, and indoor air quality assessments. He has worked on numerous site investigations and many asbestos remediation projects. These projects include industrial, commercial, and residential clients. Although most of his work has been done in Illinois, he has also done projects across the United States.

Mr. Pacifico has years of experience on asbestos and indoor air consulting for both public and private clients. His responsibilities include overseeing asbestos abatement plans and providing air monitoring clearances on site. In addition, he is also a licensed lead risk assessor that provides in depth inspections of lead-based materials and provide consultation.

Mr. Pacifico has numerous quality years of experience in indoor air quality assessments and ware and mold investigations. He has provided assessments on many residential and commercial sites that includes large loss catastrophic events. He has helped with remediation consultations and developed remediation guidelines.

Mr. Pacifico is an American ACAC certified Fire and Smoke Damage Technician and is well versed in assessing fire and smoke impacted projects. He has completed assessments on both residential and commercial sites across the United States.

Areas of Expertise

- Asbestos, lead, hazardous building materials and mold consulting
- Multi-Disciplinary Service Coordination (environmental, engineering, remediation)
- Large loss environmental assessments
- Residential and commercial abatement and demolition project management
- FBI Biosafety Cabinet Certifier

Project Experience:

Asbestos Consulting Services – Great Lakes Naval Station, North Chicago, Illinois

Principal Inspector responsible for overseeing the environmental services for a major remediation/renovation project that encompassed a 1600-acre installation in North Chicago, Illinois. This project involved abatement of known asbestos materials. The project included Asbestos Survey, Project Manuals (work procedures and drawings), Project Management, Work Observations/Air Monitoring, Final Air Clearance, Final Report, and Abatement.

Asbestos Consulting Services, Social Security Administration Offices – Arkansas, Colorado, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, Texas, Wisconsin

As Lead Inspector, I was responsible for overseeing environmental services for annual inspection and re-inspection projects at various SSA facilities nationwide. These projects involved identifying and reinspecting known asbestos materials. The scope of work included conducting asbestos surveys, preparing project manuals, performing work observations, monitoring indoor air quality, and compiling final reports.

Fire and Smoke Damage Assessment – Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Oklahoma, South Dakota, Texas, Wisconsin

I assessed fire and smoke damages on various properties across the United States. My responsibilities included conducting visual assessments, evaluating smoke travel pathways, collecting field samples, and developing remediation recommendations for final reports. The site projects encompassed a wide range of property types, including residential and commercial buildings, warehouses, manufacturing and storage facilities, farm barns, apartment complexes, and hotels.

Lead Consulting Services, Netrality, a Data Science Facility – Chicago, Illinois

Lead Inspector responsible for overseeing the environmental services for a major remediation/renovation project that involved a data science facility. This project involved abatement of known lead materials. The project included Lead Survey, Project Manuals (work procedures and drawings), and Final Report.

Water/Mold Damage Consulting Services – California, Colorado, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, South Carolina, Oklahoma, Texas, Wisconsin

Industrial hygienist providing water and mold damage assessments and moisture mapping including testing and evaluation following storm rain or catastrophic loss event. My site projects spanned healthcare facilities, sports stadiums, educational institutions, and residential and commercial buildings. I developed, managed, and provided clients with guidelines, recommendations, and direction throughout the remediation and repair process.
